

CAPABILITY OVERVIEW

Everything PulseTrack tracks, in one place

A single performance suite that replaces manual daily reports across five departments — capturing structured activity, scoring quality, watching time, and rolling it all up into live team views and trends.

Figures below are pulled from the live production workspace · rolling 3-month window · July 2026.

EMPLOYEES 24 across 5 departments	ITAD DIALS 6,383 14.7% connect rate	LEADS GENERATED 3,387 pipeline tracked to SQL
QA EVALUATIONS 69 76.2% avg · 98.6% pass	CONTENT TASKS 12 across the pipeline	ROLES ENFORCED 6 RBAC on every route

Departments 5 tracked workflows

Each department logs its own structured daily activity; PulseTrack turns it into per-agent matrices, calculated KPIs, funnels and period-over-period trends.

Coaching needed

Company-wide systems works across every department

Shared capabilities that sit above the departments — the same data, viewed for leadership, governed, and kept honest.

Executive dashboard

- Cross-department roll-up & benchmarks
- On-time submission & needs-attention
- Top performers & live activity feed
- Auto-generated executive insights

Attendance & leave

- Live check-in / out, breaks, "who's in now"
- Worked minutes, late & early-leave flags
- Office-network gate · shift 09:00–18:00
- Leave types incl. WFH — leave-aware everywhere

Reports & export

- Auto weekly / monthly roll-ups
- Per-agent QA + call activity grid
- CSV export & email to management
- No manual totals — built from daily logs

Admin & governance

- Targets (min/max) drive RAG status
- User management, roles & approvals
- Tags, holidays, office networks
- Audit log — before/after on every edit

Feedback & reviews

- Two-way Team Lead ↔ employee threads
- Sentiment: praise / neutral / improvement
- Read receipts & unread badges

Tasks & to-dos

- Assigned cross-domain tasks in one view
- Private personal to-do list
- @-mentions on shared boards

Notifications

- In-app bell: not submitted, QA coaching, stock
- Scheduled check-in / out email reminders
- Bid due-date reminders

Trends engine

- Today / Week / Month / 3-month everywhere
- Period-over-period ▲▼ deltas
- Target reference lines on every chart

THE COMMON THREAD

One period engine, one status model — on every screen

Every dashboard reads the same time controls and the same target logic, so a member, a team lead and an executive are always looking at the same numbers scoped differently.

WHO SEES WHAT

Role-based access, enforced on every route

Member	Own data & daily log only
Team Lead	Whole department, live
Sub-Dept Lead	One Marketing sub-department
QA / QA Lead	Scoring & QA oversight
Super Admin	Everything, across all teams

Capability overview generated from the live PulseTrack production workspace. All metrics reflect real logged activity over a rolling 3-month window and are illustrative of current usage, not a forecast.
